*The ratings are applicable to heavy duty diesel generator sets and are subject to normal varying load factors used in the event of a utility power failure. In this and other emergency applications, the generator set may be operated continuously with no deration except as required for ambient temperature and altitude until normal power is restored. The generator sets are rated at SAE conditions 95°F (35.4°C), 500 ft. (152.5 m); 29 in. Hg. barometer (dry) 98.19 kPa Hg. This rating conforms with DIN "B" 6275.
